MILESTONES NATIONAL REPORT 2021

EXECUTIVE SUMMARY

Since 2013, the Milestones have allowed for continuous tracking of skills development and competence of resident and fellow physicians throughout their graduate medical education. This report is a snapshot of Milestones ratings for the end of the July 1, 2020 through June 30, 2021 academic year. The COVID-19 pandemic was and continues to be highly disruptive to the graduate medical education community. The data reported in this 2021 report should be interpreted in the context of that disruption.

General Summary of Findings

- 1) Across all specialties, the number of subcompetencies assessed is provided.
- 2) Across all specialties, box plots show the mean and median of milestones ratings, as well as the variance, in general attainment across years.
- 3) Rates of straight-lining (which may be an indicator of bias or difficulty interpreting specific milestones within a local context), show substantial variation among specialties.

A Milestones Bibliography is posted on the ACGME website to track the published literature on the Milestones. The ACGME website includes many more resources to help understand the purpose and effective use of the Milestones and Milestones ratings. These include the *Milestones Guidebook*, the *Milestones Guidebook for Residents and Fellows*, and Milestones FAQs, as well as the *Assessment Guidebook*, the *Implementation Guidebook*, and the *Clinical Competency Committee Guidebook*, all accessible on the Resources page of the Milestones section of the ACGME website.

See Milestones ([acgme.org](https://www.acgme.org))

Intended Audience

The intended audience for this report includes program directors and members of programs' Clinical Competency Committees (CCCs); leaders within specialty societies who oversee the development of national curricula; members of the ACGME Review Committees that oversee accreditation of individual programs; and the residents, fellows, and faculty members in these programs. Other stakeholders who may benefit from this report include specialty boards, designated institutional officials (DIOs), policymakers, and the public.

MILESTONES NATIONAL REPORT 2021

BACKGROUND

The Milestones are intended to be used as a professional development tool to better prepare physicians for a changing health care system by emphasizing a focus on the competencies required of residents and fellows and ensuring they match societal and patients' needs in a variety of critical ways (Batalden et al 2002; Ericsson 2007; Hodges 2010; Institute of Medicine 2014; Nasca, Philibert, Brigham, and Flynn 2012).

The Milestones allow for continuous monitoring and quality improvement for graduate medical education (GME). Individual programs can focus on making improvements in both curricula and assessments that align with the specific competencies outlined by the Milestones, up to the point of graduation. This will help to ensure that graduates from these programs meet the expected standards of the profession and the goal of unsupervised practice.

Milestones Intended Purpose

Tracking of Milestones data for individual residents and fellows is part of the ACGME's commitment to meeting the responsibility of professional self-regulation, and the expectations for quality and safety from its primary stakeholder, the public (Institute of Medicine 2014; Nasca 2015; Nasca, Philibert, Brigham, and Flynn 2012). While the Milestones data allow for tracking of educational achievement at the individual level, the primary goal of the ACGME continues to be accreditation of institutions and residency and fellowship programs. The collection of individual residents' and fellows' Milestones data will only be used in aggregate form by the ACGME to address this goal. The ACGME will continue to collaborate with the American Board of Medical Specialties (ABMS), the American Osteopathic Association (AOA), and the various specialty boards toward ensuring high-quality graduates and maintenance of the public trust.

Using Milestones Data to Provide Useful Feedback to Programs

The spirit of the ACGME's accreditation model implies an educational continuous quality improvement (CQI) framework. The collection, sharing, and interpretation of Milestones data allows for refinement of policies and accreditation standards for effective education and training. These data will provide the empirical basis for working with specialty groups and programs that may require guidance to meet the expectations set out in the ACGME's accreditation model and the IHI Quadruple Aim (Bodenheimer and Sinsky 2014). In essence, the GME community must work together to ensure residents and fellows are ready for unsupervised practice following graduation, and the Milestones can provide detailed guidance for achieving this goal.

Development of the Milestones

Individual milestones were developed based on subcompetencies within each specialty (Sullivan, Simpson, Cooney, and Beresin 2013). The creation of these detailed developmental markers of progression involved members of the ACGME Review Committees, representatives from the certification boards, program directors, residents and fellows, and representatives from specialty societies. More recently, the Milestones 2.0 Work Groups have included public members. The Milestones were written to cover the six Core Competencies with educational program periods that range from single-year fellowships to residency programs lasting seven years. Milestones are grounded in important educational developmental theory and research (Batalden et al 2002; Ericsson 2007; Hodges 2010; McGaghie, Barsuk, and Wayne 2017; Pusic, Boutis, Hatala, and Cook 2015).

To make sense of such a large and complex dataset, program directors and specialty societies are encouraged to assist in interpreting these data, given the rich contextual knowledge offered by these stakeholders. Program directors can assist by considering alternatives for what might explain the observed patterns presented here, and share this with the wider community, including other program directors within their specialty and the ACGME Milestones team, to ensure the data are interpreted properly, and ultimately fulfill their potential to improve GME.

MILESTONES NATIONAL REPORT 2021

HOW TO USE THESE FINDINGS

As can be seen in the dataset, there are competency areas where the range of Milestones attainment is wide. This variance is likely due to differences in curriculum and/or assessment practices. This should be viewed as welcome news, as it is a signal the Milestones data are providing useful information to drive CQI in GME. Since the launch of the Milestones initiative in 2013, a number of validity studies have been performed to understand the strengths and weaknesses while informing ongoing improvements (Milestones Bibliography 2020). This is reflected in the growing number of specialties that have or will begin implementation of Milestones 2.0. The data in this 2021 report reflects the version of the Milestones used by the specialty during the 2020-2021 academic year.

The table below provides some specific purposes and functions of the Milestones organized by stakeholder groups.

CONSTITUENCY OR STAKEHOLDER	PURPOSE/FUNCTION
Residents and Fellows	<ul style="list-style-type: none"> • Provide a descriptive, developmental roadmap for education and training within a specialty • Increase transparency of performance requirements • Encourage informed self-directed assessment and self-directed learning • Facilitate better feedback • Facilitate development of individualized learning plans by residents and fellows
Residency and Fellowship Programs	<ul style="list-style-type: none"> • Guide curriculum and assessment tool development and improvements • Provide meaningful framework for the CCC (e.g., help create shared mental model) • Provide more explicit expectations of residents and fellows • Enhance opportunity for early identification of struggling learners • Early identification of advanced learners and the need to continuously challenge them
ACGME and the Public	<ul style="list-style-type: none"> • Public Accountability – report at an aggregated national level on competency outcomes • Build community for evaluation and research, with focus on CQI
Certification Boards	<ul style="list-style-type: none"> • Enable ongoing research to improve certification processes

MILESTONES NATIONAL REPORT 2021

METHODS

Every six months, the ACGME receives over 3.6 million Milestones ratings of over 150,000 learners from residency and fellowship programs in over 150 specialties and subspecialties across the US. The box plots reported in the following pages summarize these data.

OVERARCHING THEMES

Examining the dataset in terms of gradual progression of competence shows that:

- 1) Generally, across all specialties and all programs, the Milestones data show progressive attainment of milestones across years in program;
- 2) Not all residents/fellows reach Level 4 in all subcompetencies by graduation; and,
- 3) Each specialty shows variation in attainment of the specific Milestones. Research is beginning to identify some of the reasons for this phenomenon, such as lack of effective assessment approaches or struggles to create curricula in key areas.

Research also suggests the following possible reasons for this:

- 1) Meaningful differences in actual performance
- 2) Differences in the complexity of the Milestones competency language as written for a particular specialty
- 3) Differences in clinical exposure of some residents/fellows in some programs
- 4) Variation in scoring by individual raters
- 5) Differences in the quality of assessment rating forms
- 6) Differences in the types of assessment methods used to show attainment of a particular milestone
- 7) Differences in the combinations of assessment tools used in a program of assessment
- 8) Differences in CCC processes and approaches for determining milestone attainment

Of course, many other factors may be at play, and these are the subject of ongoing research. Until this research is mature, the data should only be reported in the context of interpretive statements and assumptions relevant to the particular stakeholder group, (i.e., DIOs, program directors, residents/fellows, the public). It is important to remember that the Milestones are designed using a continuous quality improvement approach, and that Level 4 is a recommended educational goal and not a requirement or mandate. To fully interpret and understand the results of Milestones analyses and validity studies, there must also be full awareness of the consequences, with appropriate diligence in providing context for proper interpretation of any rating result (Hubley and Zumbo 2011; Messick 1989).

MILESTONES NATIONAL REPORT 2021

Straight-Lining Ratings

Straight-lining ratings are defined as a string of identical Milestones ratings for a learner across all subcompetencies. In the original vision of the ACGME's accreditation model (aka "the Next Accreditation System"), it was assumed that performance across subcompetencies would likely vary due to contextual factors, curricular design, and variability among learner abilities, according to the content of each subcompetency. For example, a learner would not necessarily be expected to have exactly the same ratings for the milestones in patient care, interpersonal and communication skills, and systems-based practice during a given six-month period. Accurate detection of true variation in ratings would theoretically be useful for tailoring specific feedback to each learner.

Certainly, it is theoretically possible that an individual learner be assigned identical Milestone ratings across all subcompetencies (e.g., straight-lining for Milestones in Level 4 can be a valid rating pattern for the senior-most residents who, at the time of graduation, have truly achieved Level 4 in all subcompetencies). However, the data show several instances in which the rate of straight-lining is higher than what might be expected, and these rates are presented in Table 3.

The rate of straight-lining was calculated as follows: if any resident's or fellow's string of Milestone ratings was identical across all subcompetencies, the resident or fellow was assigned a value of "1;" otherwise, "0." The table provides the percentage of residents or fellows nationally who were assigned a value of "1" (meaning they had received the same rating for all their milestones).

Interpretation: Nationally, the ACGME is working to understand whether this straight-lining effect represents true lack of variation in competence, or if CCCs are simply providing similar ratings across subcompetencies for other reasons, such as a belief that the description of individual milestones for some subcompetencies does not fit with their local setting, or they are otherwise having difficulty obtaining valid and defensible ratings through lack of resources or attention to educational assessment within their programs. If a program notes high rates of straight-lining, it would be important for the program director and CCC to reflect on the causes and whether such a Milestones profile is an accurate assessment of the program's residents or fellows.

These issues continue to be the subject of ongoing qualitative studies with collaborators from various specialties.

FUTURE DIRECTIONS

The Milestones data show interesting patterns of variation that require further research to understand their full implications. In the meantime, caution should be exercised in how these results are interpreted and communicated to various stakeholders.

Milestones 2.0

In response to the information received to date, a system-wide project is currently in progress to revise the Milestones language to make it easier for program directors to understand and implement locally, as well as to examine areas in which the Milestones language can be harmonized across specialties, especially for the Competencies of Professionalism, Interpersonal and Communication Skills, Systems-based Practice, and Practice-based Learning and Improvement (Edgar, Roberts, and Holmboe 2018; Edgar et al 2018). Many specialties made the switch to Milestones 2.0 in July 2021, with most other specialties scheduled to begin the transition to Milestones 2.0 in July 2022.

MILESTONES NATIONAL REPORT 2021

Limitations

While the interpretations and conclusions that can be drawn from the data presented in this report are based on a single point in time (June 2021), trends for stability in the data patterns for academic year-end since June 2014 have recently been examined for the earliest reporting specialties. Most of the Milestones data show signs of stability across this period, which lends greater confidence to the potential interpretations and conclusions that can be drawn from them.

Acknowledgments

The authors wish to thank the program directors for their valuable insights, as well as the various stakeholder groups to whom preliminary versions of these results have been presented over past years. The Milestones staff also owes a great debt of gratitude to the staff in the ACGME's Applications and Data Analysis team for compiling the data and preparing Tables 1 and 2 and the box plots.

FIGURE 1: KEY TO BOX PLOTS

Box plots provide a rigorous and robust way to display complex data, such as for the Milestones. The components of the box plots used for the Milestones are shown below.

As seen in this diagram, the median Milestone level for each resident year is represented by the horizontal line, bounded by the 25th and 75th rank of Milestone ratings, also known as the interquartile range (IQR). The mean rating is represented by the diamond but should be interpreted with caution given the Milestones are ordinal, not interval data. “Min” represents the lowest level and “Max” the highest level (the “whiskers”), excluding outliers (represented by the open circles). As would be expected, there is a general upward trajectory in this subcompetency from Year 1 (median Level 2) to Year 4 (median Level 4).

Most Milestone sets include five levels of development with transition zones between each level (designated as half increments, such as Level 2.5). In this example, the box plot for Resident Year 1 (highlighted by the red box) shows that the median is Level 2, and the IQR extends from Level 1.5 (25th percentile rank) to Level 2.5 (75th percentile rank).

With regards to Milestone levels within an individual residency year (aka post-graduate year or PGY), the levels can be sorted from least to greatest, and then graphed as shown in this box plot. In the example above, the highest 50 percent of the Resident Year 1 group were at or above Milestone Level 2; they are represented by everything above the median line. Fifty percent of the Year 1 residents fall between Level 1.5 and Level 2.5 (IQR). Those in the top 25 percent of Milestone judgments in the Year 1 group are shown by the top “whisker” (here labeled as Max) and the outlier open circles.

The outliers represent those who were judged to be substantially higher (in this case we see two outlier circles) or were judged to be much lower than normal (in this example there are no low outliers). The number of people represented by the circles will vary by the sample size of that specialty.

Box plots provide information on more than just the four split groups. They also show which way the Milestone data can “sway.” For example, if more residents are judged much higher than just a few residents being judged much lower, the median is going to be higher, or the top whisker could be longer than the bottom one. Box plots provide a better overview of the data’s distribution nationally than simple means and standard deviations.

The box plots must be interpreted in the context of the Milestones descriptions for each subcompetency within each discipline. Provided below are links to each specialty’s Milestones Sets to help guide review of the data.

SPECIALTY: Orthopaedic Surgery

Resident Year	1	2	3	4	5	Total Residents*
# of Residents	896	893	895	876	861	4,421

*Note: There are 1 residents with an incomplete milestone evaluation that are excluded from the box plots below.

1. Patient Care - Anterior Cruciate Ligament (ACL)

Note: 672 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

2. Medical Knowledge - Anterior Cruciate Ligament (ACL)

Note: 585 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

3. Patient Care - Ankle Arthritis

Note: 804 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

4. Medical Knowledge - Ankle Arthritis

Note: 734 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

5. Patient Care - Ankle Fracture

Note: 220 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

6. Medical Knowledge - Ankle Fracture

Note: 190 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

Specialty Box Plot Report - Milestone Evaluation by Resident Year: Year-End 2020-2021

SPECIALTY: Orthopaedic Surgery

7. Patient Care - Carpal Tunnel

Note: 537 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

8. Medical Knowledge - Carpal Tunnel

Note: 491 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

9. Patient Care - Degenerative Spinal Conditions

Note: 655 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

10. Medical Knowledge - Degenerative Spinal Conditions

Note: 587 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

11. Patient Care - Diabetic Foot

Note: 797 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

12. Medical Knowledge - Diabetic Foot

Note: 738 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

Specialty Box Plot Report - Milestone Evaluation by Resident Year: Year-End 2020-2021

SPECIALTY: Orthopaedic Surgery

13. Patient Care - Diaphyseal Femur and Tibia Fracture

Note: 203 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

14. Medical Knowledge - Diaphyseal Femur and Tibia Fracture

Note: 176 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

15. Patient Care - Distal Radius Fracture (DRF)

Note: 282 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

16. Medical Knowledge - Distal Radius Fracture (DRF)

Note: 272 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

17. Patient Care - Adult Elbow Fracture

Note: 281 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

18. Medical Knowledge - Adult Elbow Fracture

Note: 242 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

Specialty Box Plot Report - Milestone Evaluation by Resident Year: Year-End 2020-2021

SPECIALTY: Orthopaedic Surgery

19. Patient Care - Hip and Knee Osteo Arthritis (OA)

Note: 433 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

20. Medical Knowledge - Hip and Knee Osteo Arthritis (OA)

Note: 396 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

21. Patient Care - Hip Fracture

Note: 197 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

22. Medical Knowledge - Hip Fracture

Note: 181 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

23. Patient Care - Metastatic Bone Lesion

Note: 875 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

24. Medical Knowledge - Metastatic Bone Lesion

Note: 813 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

Specialty Box Plot Report - Milestone Evaluation by Resident Year: Year-End 2020-2021

SPECIALTY: Orthopaedic Surgery

25. Patient Care - Meniscal Tear

Note: 592 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

26. Medical Knowledge - Meniscal Tear

Note: 521 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

27. Patient Care - Pediatric Septic Hip

Note: 635 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

28. Medical Knowledge - Pediatric Septic Hip

Note: 568 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

29. Patient Care - Rotator Cuff Injury

Note: 619 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.

30. Medical Knowledge - Rotator Cuff Injury

Note: 566 of 4,420 residents have a status of "Not Yet Rotated" and are not included in the analysis.
